Case Study

Curriculum Alignment and Resource Mapping in an Inner-City Academy (London)

An academy in East London serving a diverse student population struggled with curriculum coherence and inconsistent coverage of national learning objectives.

Challenge:

- Teachers using disparate resources not aligned with KS3 and KS4 standards
- Students moving between year groups with knowledge gaps
- Lack of cross-subject planning for shared themes (e.g., sustainability, digital skills)

Solution (Logistics Consulting Approach):

- Conducted a curriculum audit across departments
- Created progression maps from Year 7 to Year 11 in core subjects
- Developed an integrated resource guide aligned with Edexcel and AQA specifications
- Introduced cross-departmental planning meetings each term

Impact:

- Improved student progression rates by 15% over two academic years
- OFSTED report highlighted "clear and consistent curriculum implementation"
- Reduced reliance on external tutoring for GCSE catch-up
