Case Study

SMART curriculum Implementation at a Norfolk Secondary School

A secondary school in Norfolk partnered with SMART curriculum Ltd to overhaul its curriculum planning and timetabling processes. By leveraging the SMART curriculum App, the school conducted a comprehensive analysis of curriculum efficiency, staffing, and resource allocation. This data-driven approach led to:

- A more coherent and engaging curriculum aligned with the school's vision and values.
- Improved collaboration among middle leaders and governors.
- Reallocation of over £100,000 towards targeted enhancements, particularly benefiting disadvantaged students.

The initiative fostered a culture of evidence-based decision-making, reducing guesswork and enhancing pedagogical development across the school. lended.org.uk
