Case Study

Smart Equipment Rollout for Digital Classrooms (Madrid, Spain)

Client:

Public school network expanding 1:1 laptop initiative

Challenge:

Mismatched deliveries and loss of devices during installation.

Our Approach:

- Phased regional deployment with device serial tracking.
- Created a digital asset register linked to school IT administrators.

Outcome:

- 99% of laptops delivered correctly and operational within target timelines.
- Drastically reduced loss/theft by 80%.
- Created scalable model for expansion across other provinces.
