Case Study

Solar-Powered Classroom Equipment Deployment (Rift Valley, Kenya)

Client:

NGO-led rural education initiative

Challenge:

Schools without electricity needed solar-powered learning kits delivered to remote areas.

Our Approach:

- Designed customized packaging to protect solar panels and tech devices during rough transport.
- Partnered with local motorcycle couriers for last-mile delivery.

Outcome:

- 95% on-time delivery across 250+ remote schools.
- Zero equipment damage reported during shipping.
- 20,000+ students gained access to digital learning for the first time.
