Case Study

STEM Innovation Pilot (Buenos Aires, Argentina)

Client:

Network of low-cost private schools

Challenge:

Limited STEM offerings and outdated science facilities.

Our Approach:

- Helped develop low-cost, high-impact STEM labs.
- Partnered with local universities to create student mentorship programs.
- Delivered inquiry-based STEM teacher training.

Outcome:

- 100% of students completed independent science projects.
- 30% increase in students enrolling in STEM university programs.
- Pilot program expanded from 5 to 18 schools.
