Case Study

Digital Learning Equipment Rollout (Buenos Aires Province, Argentina)

Client:

Government laptop-for-every-student program

Challenge:

Deployment chaos: mismatched deliveries, lack of tracking, theft.

Our Approach:

- Designed a serialized inventory and GPS-tracking system for laptop shipments.
- Staggered rollout with regional priority assessments based on need.

Outcome:

- 99% accuracy in equipment delivery.
- Theft and loss incidents dropped by 75%.
- Enabled real-time monitoring and accountability at every school site.
