Case Study

Emergency Educational Supply Response (Manaus, Brazil)

Client:

Local government response unit after regional flooding

Challenge:

Hundreds of schools lost textbooks, supplies, and learning spaces.

Our Approach:

- Implemented rapid-response mobile warehouses near affected areas.
- Set up an online needs-assessment tool for schools to request resources.
- Prioritized emergency shipments based on student numbers and school readiness.

Outcome:

- 80% of affected schools reopened within 2 months (vs. usual 6 months).
- Over 10,000 students received emergency kits including books and tech devices.
- Recognized by UNESCO as a model for emergency educational logistics.
